## Heidenhain TNC-640 (15" screen) / Siemens 840D (19" screen) full 5-axis control

With 15" or 19" monitor included as standard, machine operation becomes an easy and pleasant job. Powerful dialogue programming SmartSelect® (Heidehain) or ShopMill® (Siemens) with fully alphanumeric keyboard, Heidenhain TNC-640 or Siemens 840D s.l. control is capable of addressing 5000 blocks (TNC-640) or 1000 blocks (840D s.l.) for full 5-axis simultaneous machining.

Regardless what type of 5-axis programs, TNC-640 (or 840D s.l.) control makes all the compensating movements in the linear axes resulted from the tilting axes. The unique feature TCPM (Tool Center Point Management) provides an optimal tool guidance and prevents contour gouging. With TCPM included, the interpolation between the start and end positions can be defined, so the face milling and peripheral milling can be implemented. The programmed feed rate and inclination angle for the milling tools can be also defined so as to obtain better surface quality during large compensating movement.
